

Description:

Diaphragm Seal Systems have been developed for protecting the measurement instrument from the dangerous process medium. PAKKENS DS-500 Series, has been designed for accurate pressure measurements in different industrial applications where the process medium can be highly viscous, aggressive, or hot. Due to the wide measurement range, CL 1.0 Accuracy Class, and wide operating temperature range, the product has become a reliable and robust one for the pressure measurement of fluids that do not attack AISI 316L.
